

SEBITTI SOFTWARE INVESTMENTS

We invest in early-stage software products with clear growth potential.

Sebitti combines capital and hands-on software development to help products reach their next growth phase.

What we invest in

We invest €10,000–€50,000 in companies and teams with:

- a software product at idea stage or already in production
- a clear need for further development
- strong growth potential

We don't just invest money – we actively co-develop the product together with the company.

Key investment terms

- Investment size: €10,000–€50,000
- Co-investment required: at least an equal amount raised from other sources
- Location: Finland
- Active involvement: Sebitti participates in software development
- Long-term focus: sustainable product development and growth
- Committed team: key people are dedicated to building the product together with Sebitti

Who should apply?

We are looking for:

- startups and teams with a software product that needs its next growth step
- products with clear development potential
- founders ready for close collaboration with an experienced software partner

HOW TO APPLY

The application process is lightweight and founder-friendly.

01

Step 1 – Short introduction

Send a brief, free-form description of your product or company. The goal is to quickly understand:

- what the product is
- the problem it solves
- whether collaboration could be a good fit

02

Step 2 – Further discussion

If we see potential, we'll ask for more details and schedule a discussion covering:

- product status and development needs
- market and competition
- team and ownership structure
- valuation and investment needs
- growth plans and market size
- use of funds and cash flow outlook

Apply or get in touch

Apply:

Send your application via the application form on our website or by email:
ohjelmistosijoitukset@sebitti.fi

Questions before applying?

You're welcome to discuss your product directly:
